DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: With respect to independent claim 1 Ohgami (US Patent 5738536) teaches a chassis with a recessed portion for receiving the keyboard therein but does not teach a panel detachably attached to the chassis, wherein interlocking device are formed both at a side of the recessed portion opposing the panel and a side of the panel for engaging with opposite sides of the keyboard to thereby retain the keyboard in the recessed portion, furthermore there is no evidence in the prior art for making this modification. With respect to independent claim 11, the prior art does not teach a panel retained in the a second recessed portion, one side of the panel releasably engaged with an opposite side of the keyboard thereby retaining the keyboard in the first recessed position, furthermore there is no evidence for doing so as in the claimed invention. With respect to independent claim 18 the prior art does not each nor make obvious a panel received in a second recess, a first retention device formed on panel for retaining the panel in the second recess, and a second retention device formed on the front face for locking to the rear side of the keyboard, wherein said keyboard can not be removed from the first recess unless the panel has been first removed form the second recess.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
